Required Documentation: (please check off each item prior to shipment)

Every design review will require the following items:

- A copy of the system design, including:
 - o location of tank on property
 - o location of any structures, etc that may affect surcharge on tank
- A copy of the soils report, including:
 - o Groundwater evaluation
 - o Soil type and characteristics
 - o Corrosive characteristics (if available)
- A check for \$300.00, made to AQX Engineering. Fee covers review and up to 3 wet-stamped, addressed plan sets, shipped via FedEx standard delivery (for special delivery or additional plan sets, see Schedule below and include fees in check). Additional fees may be required if revised calculations or plan check corrections are required. Additional fees will be negotiated prior to commencing work.
- Return address, if different from contact address above

Special Instructions, Notes, etc.: _____

Submittal Instructions:

Send all copies and payment to:

AQX Engineering
 Attn: MicroSepTec Slab Design Review
 1520 Brookhollow Dr, #45
 Santa Ana, CA 92705-5429
 (714) 662-0510

Additional fees schedule

Additional plan sets:	\$10/set
FedEx next day delivery:	\$30/delivery address, within Southern California

Under normal circumstances, all projects will be reviewed and returned within two business days. Incomplete packages, delayed communication, additional work, etc will result in delays.

I hereby authorize AQX Engineering to complete an H2O-rated traffic slab design over the MicroSepTec tank for the project above.
