TWO YEAR LIMITED WARRANTY

Norweco, Inc. warrants every new Model AT 1500 UV disinfection system to be free from defects in material and workmanship under normal use and service for a period of two years from the date of installation, as provided herein. The manufacturer will repair or replace the warranted unit or component, which in the sole judgement of the manufacturer, shows evidence of manufacturing defect, provided that the defective unit or component is returned to the factory, freight prepaid. This limited warranty shall be recognized in effect for two years from the date of installation, if a warranty registration card has been properly registered with the factory, according to the terms of this warranty. If the warranty registration card has not been registered upon installation of the Model AT 1500 UV disinfection system and returned to the factory within thirty (30) days of installation, this warranty is not in effect.

The manufacturer reserves the right to revise, change or modify the construction or design of the UV system or component parts without incurring any obligation to make such changes or modifications in earlier model components. The manufacturer reserves the right to furnish new or rebuilt component parts which, in the manufacturer's judgement, are the equivalent of the parts being replaced.

Service may occasionally be required for the AT 1500 UV disinfection system due to damage resulting from accident, improper use, abuse, tampering, improper installation, vandalism, act of God or failure to follow operating procedures. As this damage has not resulted from defects in workmanship or material, it shall not be covered by this warranty. Service charges incurred in these cases, including parts and labor, shall not be assumed by the manufacturer and shall be the responsibility of the customer.

This two year limited warranty does not include any portion of the customer's plumbing, drainage, tankage or disposal system, nor does it include freight charges (round trip) required to return the warranted component for factory replacement. The manufacturer shall not be responsible for damages of any kind or character resulting from or caused directly or indirectly by any defective component, inaccuracy, weakness, failure or delay. The warranty shall not apply to any missing components or to any items which have been disassembled, repaired, altered or tampered with, prior to their return to the factory. Therefore, if a AT 1500 unit or component part fails to meet the manufacturing standards or product representations stated herein, do not use or dismantle it. Contact the local AT 1500 distributor. The distributor will arrange to have the unit or component part returned to the factory. The manufacturer's liability is limited solely to the replacement of the defective unit or component part. The manufacturer shall not be liable for any labor involved during the removal or replacement of equipment, nor for charges for equipment, freight, transportation, inspection or handling of any unit or component part. In no case will the manufacturer be liable for loss incurred because of interruption of service or for consequential damages, contingent liabilities, or other similar expenses.

This limited warranty is, and the owner agrees that it shall be, in lieu of all other warranties whether expressed or implied. No distributor or person is authorized or permitted to make any contract or assume any other obligations or liabilities for the manufacturer. Laws governing limited warranties vary in some states and although this warranty gives the owner specific legal rights there may be additional rights not contained herein.
